

EARTHWORKS INDUSTRIES INC.
CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
MAY 31, 2020, MAY 31, 2019, AND NOVEMBER 30, 2019
(Expressed in Canadian Dollars)

EARTHWORKS INDUSTRIES INC.

(the "Company")

NOTICE OF NO AUDITOR REVIEW OF INTERIM FINANCIAL STATEMENTS

Under National Instrument 51-102, "Continuous Disclosure Obligations", Part 4, subsection 4.3(3)(a), if an auditor has not performed a review of the interim financial statements, they must be accompanied by a notice indicating that the financial statements have not been reviewed by an auditor.

The accompanying unaudited condensed consolidated interim financial statements of the Company have been prepared by management.

The Company's independent auditors have not performed a review of these condensed condensed consolidated interim financial statements in accordance with the standards established by the Canadian Institute of Chartered Accountants for a review of interim financial statements by an entity's auditors.

EARTHWORKS INDUSTRIES INC.
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
MAY 31, 2020 AND 2019 AND NOV 30, 2019

1 Nature of Business, Continued Operations and Going Concern

Earthworks Industries Inc. (the "Company") is incorporated under the laws of British Columbia, Canada and management has determined that the Company is in the development stage based on the fact it has no operations, no significant revenues and has not completed the landfill project. Its office is located at Suite 615, 800 West Pender Street, Vancouver, BC V6C 2V6.

The Company has completed an environmental impact study of a landfill project through its wholly-owned subsidiary, Cortina Integrated Waste Management Inc. ("CIWM") and received a Record of Decision to approve its lease to construct and operate the site from the United States Department of the Interior - Bureau of Indian Affairs ("BIA") in 2000. Final approval of the lease was issued in January 2007. Notice of termination of this lease was given by the BIA on August 19, 2013. The Company filed and, on October 29, 2015, succeeded in its Appeal to the Interior Board of Indian Affairs (IBIA).

Notice of termination of this lease was issued again by the BIA on March 1, 2019. The Company has filed an appeal to the BIA.

These condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. The establishment of operations by the Company and the recoverability of the amount shown for the landfill project is dependent upon the ability of the Company to obtain necessary financing, and maintaining the lease to construct and operate its site in good standing to complete the development of the landfill operation and commence future profitable operations. Management will pursue future equity financings and continued loans from related and other parties. Note 15 contains a description of the possible negative impact that the Covid 19 virus could have on the Company and its ability to carry on its activities. These matters represent a material uncertainty that may raise significant doubt about the ability of the Company to continue as a going concern. These condensed consolidated interim financial statements do not include any adjustments to the amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue in business.

In March 2019 the Company renegotiated repayment terms for the payment of the Advances from Cortina Landfill Company ("CLC"). The amended terms provides for the principal amount of US\$4,644,916 to be paid over 9 years by 8 annual payments of US\$500,000 commencing March 31, 2021 with a final payment for the remaining balance (see Note 6). The agreement provided for a payout option of US\$2,250,000 if paid on or before March 31, 2021.

2 Significant Accounting Policies

a) Basis of Presentation

These condensed consolidated interim financial statements have been prepared in accordance with IFRS as issued by the International Accounting Standards Board ("IASB") and interpretations issued by the IFRS Interpretation Committee ("IFRIC"). These consolidated financial statements have been prepared on the basis of IFRS that are effective for the Company's reporting year ended November 30, 2019. The Company is compliant with IAS 34.

These condensed consolidated interim financial statements have been prepared on a historical basis except for certain financial instruments which are measured at fair value. In addition, these consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

b) Consolidation of Financial Statements

These condensed consolidated interim financial statements include the accounts of the Company and CIWM., a subsidiary incorporated in the State of California on July 19, 1994. A wholly-owned subsidiary is an entity in which the Company has control, directly or indirectly, where control is defined as the power to govern the financial and operating policies of an enterprise so as to obtain benefits from its activities. References to "the Company" include Cortina Integrated Waste Management, Inc. Intercompany balances and transactions have been eliminated upon consolidation.

Significant Accounting Policies (continued)

a) Financial Instruments

Under IFRS 9, financial assets are classified and measured based on the business model in which they are held and the characteristics of their contractual cash flows. IFRS 9 contains three primary measurement categories for financial assets: measured at amortized cost, fair value through other comprehensive income (FVTOCI), and fair value through profit and loss (FVTPL).

Financial assets that meet the following conditions are subsequently measured at amortized cost:

- the financial asset is held within a business model whose objective is to collect contractual cash flows; and
- the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The Company measures its cash and accounts receivables at amortized cost.

Financial assets that meet the following conditions are subsequently measured at FVTOCI:

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling; and the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are subsequently measured at FVTPL, except that at the date of initial application/initial recognition of a financial asset the Group may irrevocably elect to present subsequent changes in fair value of an equity investment in OCI if that equity investment is neither held for trading nor contingent consideration recognized by an acquirer in a business combination to which IFRS 3 Business Combinations applies.

The Company does not have any financial assets measured at FVOCI or FVTPL.

EARTHWORKS INDUSTRIES INC.
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
MAY 31, 2020 AND 2019 AND NOV 30, 2019

Significant Accounting Policies (continued)
Financial Instruments (continued)

(b) Impairment on Financial Assets

At each reporting date the Company assesses whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or group of financial assets is deemed to be impaired, if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset and that event has an impact on the estimated future cash flows of the financial asset or the group of financial assets.

(c) Financial Liabilities

Financial liabilities at amortized cost including accounts payable and accrued liabilities, Notes payable, advances from Cortina Landfill Company and accrued interest on convertible debt are subsequently measured at amortized cost, using the effective interest method.

International Financial Reporting Standard 7, Financial Instruments Disclosures, establishes a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 - quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 - inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3 - inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company's financial instruments include: cash, amounts receivable, accounts payable and accrued liabilities, due to related parties, notes payable, interest on convertible loans, and advances from Cortina Landfill Company. The carrying value of the financial instruments approximates their fair values. There were no assets or liabilities recorded at fair value as at May 31, 2020 and November 30, 2019.

Compound Financial Instruments

Compound financial instruments issued by the Company comprise convertible debentures that can be converted into shares of the Company at the option of the holder, and the number of shares to be issued does not vary with changes in their fair value. The liability component of a compound financial instrument is recognized initially at the fair value of a similar liability that does not have an equity conversion option. The equity component is recognized initially as the difference between the fair value of the compound financial instrument as a whole and the fair value of the liability component. Any directly attributable transaction costs are allocated to the liability and equity components in proportion to their initial carrying amounts. Subsequent to the initial recognition, the liability component of a compound financial instrument is measured at amortized cost using the effective interest method. The equity component of a compound financial instrument is not re-measured subsequent to initial recognition. Interest, dividends, losses and gains relating to the financial liability are recognized in profit or loss. When the conversion option is exercised, the consideration received is recorded as share capital and the equity component of the compound financial instrument is transferred to share capital.

When the Company extinguishes convertible debentures before maturity through early redemption or repurchase where the conversion option is unchanged, the Company allocates the consideration paid and any transaction costs for the repurchase or redemption to the liability and equity components of the instrument at the date of settlement. The method used in allocating the consideration paid and transaction costs to the separate components is consistent with the method used in the original allocation to the separate components of the proceeds received by the entity when the convertible instrument was issued. The amount of gain or loss relating to the early redemption or repurchase of the liability component is recognized in profit or loss. The amount of consideration relating to the equity component is recognized in equity.

Derecognition of Financial Assets

The Company derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the final asset and substantially all the risks and rewards of ownership to another entity.

Derecognition of Financial Liabilities

The Company derecognizes financial liabilities when, and only when, the Company's obligations are discharged, cancelled, or they expire.

d) Cortina Landfill Project Costs

The Company is proceeding with final federal approvals with respect to the development of the Cortina Landfill Project and accordingly follows the practice of capitalizing all costs related to the project until such time as the project is put into commercial use, sold or abandoned. If commercial use commences, the capitalized costs will be amortized on a units of production basis. If the project is abandoned, the related capitalized costs will be written-off to profit or loss.

The amounts shown for the Cortina Landfill Project represent costs to date and are not intended to reflect present or future values. The actual amounts to be recovered from the project are uncertain and not determinable until the project is completed. Changes in future conditions could require a material change in the recognized amount.

e) Equipment

Equipment is carried at cost less accumulated amortization. Amortization is provided using the declining balance method at the following annual rates:

Computer equipment	30%
Office equipment	20%

In the year of acquisition, amortization is recorded at one-half the normal rate.

EARTHWORKS INDUSTRIES INC.
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
MAY 31, 2020 AND 2019 AND NOV 30, 2019

Significant Accounting Policies (continued)

f) Loss Per Share

Basic loss per share is calculated by dividing the loss for the period by the weighted average number of shares outstanding during the period. Diluted loss per share is calculated using the treasury stock method. Under the treasury stock method, the weighted average number of shares outstanding used in the calculation of diluted loss per share assumes that the deemed proceeds received from the exercise of stock options, share purchase warrants and their equivalents would be used to repurchase common shares of the Company at the average market price during the period.

Existing stock options, share purchase warrants and convertible loans have not been included in the computation of diluted loss per share as to do so would be anti-dilutive. Accordingly, basic and diluted loss per share are the same.

g) Foreign Currency Translation

The reporting currency of the Company is the Canadian dollar.

The functional currency of each of the parent company and its subsidiary is measured using the functional currency of the primary economic environment in which that entity operates. The consolidated financial statements are presented in Canadian dollars, which is the parent company's functional and presentation currency. The functional currency of the subsidiary is the United States dollar.

Transactions and balances:

Foreign currency transactions are translated into the functional currency using exchange rates prevailing at the date of the transaction. Foreign currency monetary items are translated at the period-end exchange rate. Non-monetary items measured at historical cost continue to be carried at the exchange rate at the date of the transaction. Non-monetary items valued at their fair value are reported at the exchange rate at the date when fair values were determined.

Exchange differences arising on the translation of monetary items or on settlement of monetary items are recognized in profit or loss in the statement of comprehensive loss in the period in which they arise.

Exchange differences arising on the translation of non-monetary items are recognized in other comprehensive income in the statement of comprehensive loss to the extent that gains and losses arising on those non-monetary items are also recognized in other comprehensive income.

Where a non-monetary gain or loss is recognized in profit or loss, the exchange component is also recognized in profit or loss.

Parent and Subsidiary Companies (Group):

The financial results and position of foreign operations whose functional currency is different from the presentation currency are translated as follows:

- assets and liabilities are translated at period-end exchange rates prevailing at the reporting date
- income and expenses are translated at monthly average exchange rates

Exchange differences arising on translation of foreign operations are transferred directly to exchange difference on translation of foreign operations in other comprehensive loss. These differences are recognized in profit or loss in the period in which the operation is disposed of.

h) Share-Based Compensation

The Company has a stock option plan that allows certain officers, directors, consultants, and related company employees to acquire shares of the Company. The fair value of the options is recognized as an expense with a corresponding increase in equity.

Share-based payments to employees and others providing similar services are measured at grant date at the fair value of the instruments issued. Fair value is determined using the Black-Scholes option pricing model taking into account the terms and conditions upon which the options were granted. The amount recognized as an expense is adjusted to reflect the actual number of share options that are expected to vest. Each tranche awarded with graded vesting is considered a separate grant with a different vesting date and fair value. Each grant is accounted for on that basis.

Share-based payments to non employees are measured at the fair value of the goods or services received, unless that fair value cannot be estimated reliably, in which case the fair value of the equity instruments issued is used. The value of the goods or services is recorded at the earlier of the vesting date or the date the goods or services are received.

Share-based payments are recorded as an operating expense and as contributed surplus. When options are exercised, the consideration received is recorded as share capital. In addition, the related share based payments originally recorded as contributed surplus are transferred to share capital.

i) Income Taxes

Income tax comprises current and deferred tax. Income tax is recognized in the statement of comprehensive loss except to the extent that it relates to items recognized directly in other comprehensive income or directly in equity, in which case the income tax is also recognized directly in other comprehensive income or equity, respectively.

EARTHWORKS INDUSTRIES INC.
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
MAY 31, 2020 AND 2019 AND NOV 30, 2019

Significant Accounting Policies (continued)

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted, at the end of the reporting period, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognized using the liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, and for operating losses or tax credits. Deferred income tax is determined on a non-discounted basis using tax rates and laws that have been enacted or substantively enacted at the reporting date and are expected to apply when the deferred tax asset is realized or liability is settled. Deferred tax assets are recognized to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences can be utilized.

j) Share Issue Costs

Share issue costs incurred on the issue of the Company's shares are charged directly to share capital.

k) Valuation of Equity Units Issued In Private Placements

The Company has adopted a residual value method with respect to the measurement of shares and warrants issued as private placement units. The residual value method first allocates value to the more easily measurable component based on fair value and then the residual value, if any, to the less easily measurable component.

The fair value of the common shares issued in the private placements was determined to be the more easily measurable component and were valued at their fair value, as determined by the closing quoted bid price on the announcement date. The balance, if any, is allocated to the attached warrants. Any fair value attributed to the warrants is recorded as contributed surplus.

l) Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of assets requiring a substantial period of time to get ready for their intended use or sale are capitalized as part of the cost of that asset.

m) Significant Accounting Estimates and Judgments

The preparation of financial statements requires management to make estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. These condensed consolidated interim financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the condensed consolidated interim financial statements and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions, and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Critical Accounting Estimates:

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period that could result in a material adjustment to the carrying amounts of assets and liabilities in the event that actual results differ from assumptions made relate to, but are not limited to, the following:

- the assessment of the Cortina Landfill Project assets included in the statements of financial position for indicators of impairment;
- the inputs used in accounting for share-based compensation; and
- the recognition of deferred income tax assets.

Critical Judgments:

Critical judgments include the analysis of the functional currency for each entity of the Company and the going concern assessment (see Note 1). In concluding that the Canadian dollar and the US dollar are the functional currencies of the parent and its subsidiary respectively, management considered the currency that mainly influences the cost of providing goods and services in each jurisdiction in which the Company operates.

n) Long-lived assets

At the end of each reporting period the carrying value of the Company's long-lived assets are reviewed to determine whether there is any indication that those assets are impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. The recoverable amount is the higher of fair value less costs to sell or value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to the present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in profit or loss for the period. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
MAY 31, 2020 AND 2019 AND NOV 30, 2019

Significant Accounting Policies (continued)

o) Restoration, Rehabilitation, and Environmental Obligations

An obligation to incur restoration, rehabilitation or environmental costs arises when environmental disturbance is caused. Such costs arising from the decommissioning of plant and other site preparation work, discounted to their net present value are provided for and capitalized at the start of each project to the carrying amount of the asset, along with a corresponding liability as the obligation to incur such costs arises. The timing of the actual rehabilitation expenditures is dependent on a number of factors such as the life and nature of the asset, the operating license conditions and, when applicable, the environment in which the landfill operates.

Discount rates using a pre-tax rate that reflects the time value of money are used to calculate net present value. These costs are charged against profit or loss over the economic life of the related asset through amortization using either the unit of production or the straight line method. The corresponding liability is progressively increased as the effect of discounting unwinds, creating an expense recognized in profit or loss.

Decommissioning costs are also adjusted for changes in estimates. Those adjustments are accounted for as a change in the corresponding capitalized cost, except where a reduction in costs is greater than the unamortized capital cost of the related assets, in which case the capitalized cost is reduced to \$nil and the remaining adjustment is recognized in profit or loss.

The operations of the Company have been, and may in the future be, affected from time to time in varying degree by changes in environmental regulations, including those for site restoration costs. Both the likelihood of new regulations and their overall effect upon the Company are not predictable.

The Company has no material restoration, rehabilitation or environmental obligations as the disturbance to date is insignificant.

p) Standards, Amendments and Interpretations Not Yet Effective

Certain pronouncements were issued by the IASB or the IFRS Interpretive Committee that are mandatory for accounting periods beginning after January 1, 2019 or later periods.

The following new standards, amendments and interpretations, which have not been early adopted in these consolidated financial statements, are not expected to have an effect on the Company's future results and financial position:

IFRS 16 Leases

IFRS 16 was issued in January 2016 and specifies how an IFRS reporter will recognize, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. Lessors continue to classify leases as operating or finance, with IFRS 16's approach to lessor accounting substantially unchanged from its predecessor, IAS 17. This standard is effective for reporting periods beginning on or after January 1, 2019.

The Company intends to adopt IFRS 16 for its fiscal year 2020 and plans to use the modified retrospective approach which doesn't require restatement of prior year financial statements. The Company will continue to make its overall analysis and evaluate the potential impact on financial statements and additional disclosure requirements.

q) Adoption of New Accounting Standards

IFRS 9, Financial Instruments

The Company adopted IFRS 9 Financial Instruments on December 1, 2018 under the modified retrospective approach. Any adjustments to the carrying amount of financial assets and liabilities as of the date of transition were not significant.

IFRS 9 uses a single approach to determine whether a financial asset is classified and measured at amortized cost or fair value. Financial assets are classified and measured based on the business model in which they are held and the characteristics of their contractual cash flow. The financial assets are subsequently measured at amortized cost, fair value through profit and loss or fair value through other comprehensive income. The table below summarized the classification and measurement of the Company's financial instruments accounted under IFRS 9 as compared to the previous policies in accordance with IAS 39. There were no assets or liabilities recorded at fair value as at November 30, 2019.

Financial Assets	IAS 39	IFRS 9
Cash	Loans and receivables (amortized cost)	Amortized Cost
Accounts Receivable	Loans and receivables (amortized cost)	Amortized Cost
Financial Liabilities		
Accounts payable and accrued liabilities	Other financial liabilities (amortized cost)	Amortized Cost
Notes payable	Other financial liabilities (amortized cost)	Amortized Cost
Accrued Interest on convertible loan	Other financial liabilities (amortized cost)	Amortized Cost
Advances from Cortina Landfill Company	Other financial liabilities (amortized cost)	Amortized Cost

EARTHWORKS INDUSTRIES INC.
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
MAY 31, 2020 AND 2019 AND NOV 30, 2019

Significant Accounting Policies (continued)

IFRS 9 also introduced a single expected credit loss impairment model, which is based on changes in credit quality since initial recognition. The Company did not have any significant receivables outstanding as at February 29, 2020 which required the use of the expected credit loss impairment model.

Amendments to IFRS 2 – Share-Based Payment

These amendments added guidance that introduces accounting requirements for cash-settled share-based payments that follow the same approach as used for equity-settled share-based payments. They introduced an exception into IFRS 2 so that a share-based payment where the entity settles the share-based payment arrangement net is classified as equity-settled in its entirety, provided the share-based payment would have been classified as equity-settled had it not included the net settlement feature. Finally, they clarify the accounting treatment in situations where a cash-settled share-based payment changes to an equity-settled share-based payment because of modifications of the terms and conditions. The adoption of the amendment did not have a material impact on the Company's financial results.

IFRIC 22 – Foreign Currency Transactions and Advance Consideration

This interpretation clarifies the accounting for transactions that include the receipt or payment of advance consideration in a foreign currency. It covers foreign currency transactions when an entity recognizes a nonmonetary asset or non-monetary liability arising from the payment or receipt of advance consideration before the entity recognizes the related asset, expense or income. It does not apply when an entity measures the related asset, expense or income on initial recognition at fair value or at the fair value of the consideration received or paid at a date other than the date of initial recognition of the non-monetary asset or non-monetary liability. Also, the Interpretation need not be applied to income taxes, insurance contracts or reinsurance contracts. The adoption of the interpretation did not have a material impact on the Company's financial results.

3 Financial Instruments and Financial Risk Management

a) Financial Instruments

The Company had no fair-value-through-profit-or-loss financial assets as at May 31, 2020, November 30, 2019 and November 30, 2018.

b) Financial Risk Management

(i) Overview:

The Company has exposure to credit risk, liquidity risk and market risk. The Company's Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework and reviews the Company's policies on an ongoing basis.

(ii) Credit Risk:

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. At November 30, 2019, substantially all of the Company's cash was held at a recognized Canadian National financial institution. As a result, the Company was exposed to all of the risks associated with that institution. The Company has no accounts receivable at the current year end and as the Goods and Services tax recoverable is recoverable from the federal Government of Canada, the Company does not currently face significant credit risk.

(iii) Liquidity Risk:

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they come due. The Company regularly reviews its current obligations, and to the extent that the Company may not have sufficient liquidity to meet these obligations, management considers securing additional funds through equity or debt transactions.

At February 29, 2020 the Company had current assets of \$58,588 (2019 - \$30,165) and current liabilities of \$1,471,070 (2019- \$1,455,740). Management recognizes its liquidity risk and will pursue future equity financings and continued loans from related and other parties.

(iv) Market Risk:

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its financial instruments.

The Company is developing its Landfill Project in California, and as a result is subject to currency risk. Project costs are denominated in U.S. dollars and the loan advanced by Cortina Landfill Company ("CLC") to finance much of the ongoing cost is also in U.S. dollars. To this point in time the Company does not hedge the risk related to the fluctuations in the exchange rate between the U.S. and Canadian dollar as it relates to the Company's obligations. Management may decide to consider hedging the risk in the future.

		May 31, 2020		November 30, 2019

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
MAY 31, 2020 AND 2019 AND NOV 30, 2019

Financial Instruments and Financial Risk Management (continued)

b) Financial Risk Management (continued)

At May 31, 2020, if the U.S. dollar had strengthened 10 percent against the Canadian dollar with all other variables held constant, the comprehensive loss for the year would have been \$353,000 higher (2019 - \$549,000). Conversely, if the U.S. dollar had weakened 10 percent against the Canadian dollar with all other variables held constant, the comprehensive loss would have been \$353,000 lower (2019 - \$549,000).

The Company is subject to interest rate risk on its notes payable as the interest is tied to Royal Bank of Canada's prime rate ("Prime"). However, lending rates are currently low and management considers the loans to be short term and the interest rate risk is not considered material.

(v) Fair Value of Financial Instruments:

The carrying values of cash, accounts payable and accrued liabilities, advances from Cortina Landfill Company, notes payable and the liability component and accrued interest on convertible loans approximate their fair values due to the relatively short periods to maturity and terms of these financial instruments.

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

4 Capital Structure and Management

The Company manages its capital to maintain its ability to continue as a going concern, to meet its financial obligations and to provide benefits to its shareholders and other stakeholders. The capital structure of the Company consists of shareholders' equity comprised of issued capital, share subscription advance, equity portion of convertible loans, contributed surplus, accumulated other comprehensive income and deficit.

The Company manages its capital structure and makes changes to it in light of changes in economic conditions and the risk characteristics of its underlying assets. The Company, with the approval of the Board of Directors, will continue to balance its overall capital structure through new share or debt issuances or by other activities as deemed appropriate.

There were no changes to the Company's approach to capital management during the years ended November 30, 2019 and 2018. The Company is not subject to externally imposed capital requirements.

6 Cortina Landfill Project

The Company has negotiated a Business Lease and completed an Environmental Impact Statement for an integrated waste management project located on the Cortina Indian Rancheria in Colusa County, California. The BIA issued final approval of the Lease in January 2007, and the Wintun Environmental Protection Agency, Board of Commissioners, issued the Authority to Construct in October 2008.

The Company leased a portion of the land located within the Cortina Indian Rancheria in Colusa County, California, for the purpose of developing and operating a sanitary landfill and materials recovery facility for an initial term of twenty-five years (with a renewal term of an additional twenty-five years), which commenced on the date the lease was approved for consideration of:

- (i) \$10,000 U.S. payable within 21 days of the lease being approved by the BIA;
- (ii) \$15,000 U.S. per month commencing the first month following the month in which commercial production commences, with monthly payments being indexed on an annual basis according to increases in the Cost of Living Index as published by the United States Government; and

Cortina Landfill Project (continued)

- (iii) Fees equal to 3% of gross revenue on the first 150,000 tonnes of waste received in a fiscal year, to be calculated and paid monthly, and 5% of gross revenue for waste in excess of 150,000 tonnes received in a fiscal year.

The Company also agreed to pay all of the Cortina Tribe's reasonable attorney fees and costs incurred by Tribal officials and attorneys in carrying out their obligations under this Agreement.

In April 2007, an agreement was signed to sell 50% of the issued shares of Cortina Integrated Waste Management (CIWM), the Company's wholly-owned subsidiary and the owner and developer of the project, to the Cortina Landfill Company (CLC), a 100% owned subsidiary of North Bay Corporation ("North Bay") of Santa Rosa, California. On December 23, 2009, North Bay and CLC notified Earthworks that they would not be exercising their option to acquire 50% of the issued shares of CIWM nor continue funding the development of its waste management facility in Colusa County, California. Subsequently, a number of agreement amendments and extensions were agreed to (in U.S. dollars).

On October 26, 2008, the Wintun Environmental Protection Agency issued the Authority to Construct for the Class III Municipal Solid Waste Landfill portion of the project.

On August 19, 2013, the Company received a Notice of Termination of its lease on the Cortina Rancheria. On September 16, 2013, an appeal was filed with the Interior Board of Indian Appeals (IBIA) challenging the validity and sufficiency of the reasons for the termination by the Bureau of Indian Affairs. The Company filed its required opening brief of the appeal on February 3, 2014. On October 29, 2015, the IBIA, U.S. Department of the Interior, issued its Order reversing the decision of the Regional Director thereby reinstating the Lease.

The Company received a second notice dated March 1, 2019 from the US Bureau of Indian Affairs advising that the Lease held by the Company with the Kletsel Dehe Band of Wintun Indians has been terminated. The Company believes that the allegations are unfounded and will not be upheld. The Company has filed an appeal.

Cancellation and Replacement of the Agreement

In March 2019 the Company entered into an amended agreement for the loan payable to North Bay/CLC. The March 2018 amended Agreements and subsequent amendments, has been cancelled and replaced as follows:

The amended agreement provides for the principal amount of US\$4,644,916, with instalments payable annually commencing March 31, 2021. The payout option of the amended agreement has increased to US\$2,250,000 and the deadline for the exercise of the payout option is extended to March 31, 2021. In addition, the Company has issued US\$20,000 of shares pursuant to the Company's subsequent private placement. The Company borrowed an additional US\$50,000 from CLC which was repaid during 2019. In the event that The Company signs and closes an arms length agreement to sell 100% of the shares of the Company exceeding the balance amount, the following will result:

- i) The Company will pay to CLC the whole amount of the balance amount and accrued interest owing.
- ii) The Company will pay to CLC 10% of the amount received less the amount paid in part (i) and less the Company's direct investment and costs into the project being US\$6,720,633.

	\$ 699,485	\$ 694,781

8 Convertible Loans (see note 10f)

In June 2011, the Company issued two convertible loans in the amounts of \$700,000 and \$25,000. The lenders had the option to, in whole or in part and from time to time, until May 31, 2014 (the "Maturity Date") convert all or portions of the loaned funds to the acquisition of Units – one Unit to be issued for each \$0.30 of loan converted. Each Unit consisted of one share of the Company and one-half of a share purchase warrant. Each whole warrant entitled the holder to purchase an additional share of the Company for a price of \$0.43 per share until the Maturity Date. The Convertible Loans are divided between a liability component and an equity component. The liability component represents the present value of the term debt discounted using the discount rate that would have been applicable to non-convertible debt. The equity component was determined as the residual of the face value of the debt less the liability component. This balance was accreted over the period of the loans using the effective-interest-rate method at a weighted average effective interest rate of 33.94% and included in convertible loan interest and accretion expense.

The loans bear interest until they are converted or repaid at 8.5% per annum, compounded monthly. Any principal or interest which has not been prepaid or converted was payable on the Maturity Date.

The lenders made the loans to the Company on an unsecured basis. They were issued 362,500 shares in the capital of the Company as bonuses. These shares are valued at \$0.35 per share (\$126,875).

In 2014, the Company repaid \$525,000 in principal of the convertible loan. The Debtholder agreed to extend the term of the remaining principal balance of \$200,000 and unpaid accrued interest of \$210,231 until May 31, 2015.

In June and October 2015, the Company paid \$59,500 to retire \$59,500 in principal of the remaining convertible loan. The debtholder reinvested in the private placement share offering on June 3, 2015 (\$39,500) and October 1, 2015 (\$20,000). At November 30, 2015, the remaining obligation included the remaining principal balance of \$140,500 and unpaid accrued interest of \$244,550.

During the year ended November 30, 2015, the debtholder agreed to extend the term of the remaining convertible loan until November 30, 2016. During the year ended November 30, 2016 the debtholder agreed to extend the term of the remaining convertible loan until November 30, 2017. Upon extension, the remaining convertible loan was divided between a liability component and an equity component. The liability component represents the present value of the term debt discounted using the discount rate that would have been applicable to non-convertible debt. The equity component was determined as the residual of the face value of the debt less the liability component. The balance is accreted over the period of the remaining convertible loan using the effective-interest-rate method. At May 31, 2020 the principal obligation has been paid and unpaid accrued interest of \$352,055 (2019 - \$337,500) remains outstanding.

		<u>6,500,000</u>	<u>\$ 425,000</u>	<u>4,250,000</u>

Stock Options

The Company has adopted an incentive stock option plan (the "Plan"). The essential elements of the Plan provide that the aggregate number of common shares of the Company's capital stock issuable pursuant to options granted under the Plan may not exceed 10% of the number of issued shares of the Company at the time of the granting of the options. Options granted under the Plan will have a maximum term of ten years. The exercise price of options granted under the Plan will not be less than the discounted market price of the common shares (last closing market price of the Company's common shares immediately preceding the issuance of a news release announcing the granting of the options, less the maximum discount permitted under TSX Venture Exchange policies), or such other price as may be agreed to by the Company and accepted by the TSX Venture Exchange. Options granted under the Plan vest immediately, except for options granted to consultants conducting investor relations activities, which become vested with the right to exercise one-fourth of the options upon the conclusion of each three month period subsequent to the grant date.

A summary of the status of the Company's stock option plan as at May 31, 2020, and November 30, 2019, and changes during the periods then ended is as follows:

	2020		2019	
	Options	Weighted Average Exercise Price	Options	Weighted Average Exercise Price
Options Outstanding, beginning of year	5,950,000	\$ 0.10	5,540,000	\$ 0.20
Expired / Cancelled			(1,100,000)	0.21
Granted	1,150,000	0.10	1,510,000	0.10
<u>Options Outstanding, end of year</u>	<u>7,100,000</u>	<u>\$ 0.10</u>	<u>5,950,000</u>	<u>\$ 0.10</u>

During the year ended November 30, 2019, the Company re-priced 4,440,000 options to an exercise price of \$0.10 per option, and extended the expiry dates to June 30, 2022. The modified options were re-valued using Black Scholes as of the modification date of June 30, 2019. The modifications resulted in an increase of \$95,583 in share based compensation for the year ended November 30, 2019.

The Company has outstanding stock options to acquire 6,350,000 shares of the Company's capital stock as follows:

Number of Options	Exercise Price (\$)	Note	Expiry Date
5,950,000	0.10		June 30, 2022
400,000	0.10	1	June 30, 2022
750,000	0.10	2	July 15, 2021
<u>7,100,000</u>	<u>0.10</u>		

During the six months ended May 31, 2020, the Company granted the following stock options:

- 400,000 options expiring June 30, 2022 with an exercise price of \$0.10.
- The Company has entered into a 1-year agreement for investor relations services. Under this agreement, dated April 15, 2020, the provider will be paid \$5,000 per month in the first 3 months and \$7,000 for the balance of the 12 months – subject to the Company's right to terminate the Agreement after 3 months. In addition, the Company has granted the service provider options to purchase 750,000 shares of the Company at a price of ten cents (\$0.10) per share. The options will vest in 5 tranches of 150,000 each on April 15, 2020, July 15, 2020, October 15, 2020 and January 15, 2021. In the event that the Agreement is terminated prior to April 15, 2021, the outstanding options will also terminate 90 days after the termination.

During the year ended November 30, 2019, the Company granted the following stock options:

1,510,000 options expiring June 30, 2022 with an exercise price of \$0.10.

The fair value of the option granted and re-priced were estimated at the grant date using the Black-Scholes option pricing model with the following weighted average assumptions:

	2020	2019
Share price	\$ 0.100	\$ 0.075
Exercise price	\$ 0.10	\$ 0.10
Estimated annual volatility	114.00%	114.00%
Risk-free interest rate	1.45%	1.45%
Expected life (years)	2.5	3
Expected dividend yield	\$ -	\$ -

Annualized volatility is estimated using the historical stock price of the Company.

The following table summarizes information about the stock options outstanding and exercisable at May 31, 2020:

Range of Prices (\$)	Number of Options	Weighted Average Remaining Life (Years)	Weighted Average Exercise Price (\$)
\$0.10	5,950,000	1.82	0.10
\$0.10	400,000	1.82	0.10
\$0.10	750,000	1.17	0.10
	<u>7,100,000</u>	<u>1.82</u>	<u>0.10</u>

11 Income Taxes

Income tax recovery varies from the amount that would be computed from applying the combined federal and provincial tax rate to loss before taxes as follows:

Year ended	November 30, 2019	November 30, 2018
Net loss for the year before tax	\$ (936,425)	\$ (1,150,196)
Statutory Canadian corporate tax rate	27.00%	26.92%
Anticipated tax expenses (recovery)	(252,836)	(309,633)
Change in tax rates	-	(382)
Tax benefits not recognised	(2,363)	-
Non-capital loss expired	322	-
Non-deductible items for tax purposes	45,726	42,495
Difference in tax rates in other jurisdictions	9,376	15,050
Change in tax benefits	199,775	252,470
Current and deferred income tax	\$ -	\$ -

The significant components of the Company's deferred tax assets are as follows:

	November 30, 2019	November 30, 2018
Research and development	\$ 620,127	\$ 493,347
Equipment	16,954	16,694
Non-capital loss carry forwards	1,892,276	1,912,880
Share issue costs	1,890	132
Note payable	76,345	-
Convertible debenture	33,533	-
Unrecognized tax assets	(2,641,125)	(2,423,053)
Net deferred tax assets	\$ -	\$ -

The Company has approximately the following available non-capital losses for Canadian income tax purposes which may be carried forward to reduce taxable income in future years. If not utilized, the non-capital losses of approximately \$6,845,000 expire as follows:

2026	\$ 380,000
2027	522,000
2028	562,000
2029	479,000
2030	592,000
2031	774,000
2032	728,000
2033	293,000
2034	608,000
2035	457,000
2036	415,000
2037	524,000
2038	480,000
2039	31,000
<u>\$</u>	<u>6,845,000</u>

At November 30, 2019 the Company has unclaimed landfill costs for Canadian income tax purposes in the amount of \$235,621 (2018 - \$235,621) which may be deducted against future taxable income on a discretionary basis.

The Company has available tax loss carry forwards of approximately US\$217,000 (2018 - US\$185,000) which may be carried forward to reduce taxable income in the United States in future years. If not utilized, the available loss carry forwards expire between 2018 and 2038.

At November 30, 2019, the Company has unclaimed landfill costs for US income tax purposes in the amount of approximately US\$9,679,800 (2018 - US\$9,258,800) which may be deducted against future taxable income on a discretionary basis.

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
MAY 31, 2020 AND 2019 AND NOV 30, 2019

The Company's activities are all in one industry segment of waste disposal.

Property and equipment by geographical segments is as follows:

	Canada	United States	Total
May 31, 2020			
Equipment	\$ 1,891	\$ -	\$ 1,891
Cortina Landfill Project	-	11,063,487	11,063,487
	<u>\$ 1,891</u>	<u>\$ 11,063,487</u>	<u>\$ 11,065,378</u>
November 30, 2019			
Equipment	\$ 2,254	\$ -	\$ 2,254
Cortina Landfill Project	-	10,997,776	10,997,776
	<u>\$ 2,254</u>	<u>\$ 10,997,776</u>	<u>\$ 11,000,030</u>

13 Bonus Commitment

In the case of:

- (i) the sale of 50.1% or more of CIWM; or
- (ii) the sale of 50.1% or more of CIWM's Cortina Landfill Project; or
- (iii) the sale of 50.1% or more of the Company's assets; or
- (iv) the acquisition by new principals, or a group more than 50% of the principals of which are not directly principals of the Company, of 33.34% or more of the issued shares of the Company; or
- (v) a de facto change of control of the Company and its management to a group the majority of which are not principals of the Company and which does not include the current principals of the Company.

A cash bonus of \$1 million shall become payable on or before the 60th day following any of the change of control events described above, as follows:

- (i) 60% to a corporation controlled by the President of the Company;
- (ii) 20% to be divided evenly between and paid to the other than sitting Directors of the Company; and
- (iii) the remaining 20% will be divided and allocated between the then sitting Directors and others who have contributed to the success of the Company, excluding the current President, as determined by the Board of Directors.

In addition, the bonus shall become payable within 180 days of commercial production if the project is completed and put into commercial production by and under the control of the Company.

14 Supplemental Cash Flow Information

Changes in non-cash working capital for the six months ended May 31, 2020 and the year ended November 30, 2019 were comprised of the following:

	2020	2019
Goods and services tax receivable	\$ 490	\$ 345
Prepaid expenses and deposits	(11,256)	306
Accounts payable and accrued liabilities	(57,226)	86,237
Net Change	<u>\$ (67,992)</u>	<u>\$ 86,888</u>

The Company incurred non-cash financing and investing activities during the six months ended May 31, 2020 and the year ended November 30, 2019::

	2020	2019
Non-cash financing and investing activities:		
Issue of share capital for:		
Shares issued for accrued management fees	\$ 7,500	\$ -
Shares issued to partially settle a loan payment	\$ -	\$ 25,000
Shares issued for interest	\$ -	\$ 20,000

During the year ended November 30, 2019 the Company accepted an offer from one of its suppliers to settle an outstanding account payable. This resulted in a gain of \$140,012.
